- On Sunday, August 9th, 2020, Interactive Media Production group of University of Vishnu Vardhan Â. George Bernard Shaw - .Q: If  $\sum a_n$  converges, does  $\sum b_n$  also converge? I'm a relative noob to this site and I'm aware that this is a pretty basic question, and the answer is obviously yes, but just in case I'm not finding anything on this site about it: Let  $a_n$  and  $b_n$  be sequences of real numbers. Assume that  $\sum a_n$  converges. Is  $\sum b_n$  also convergent? I can prove that it converges, but is it true in general? Thanks in advance. A: (If I'm interpreting the question correctly.) You have  $b_n = a_n - a_{n+1}$  for all  $n$ , hence the sequence  $\{b_n\}_{n=1}^{\infty}$  is just the difference between two terms of the sequence  $\{a_n\}_{n=1}^{\infty}$ . The statement you want then just says that if the sequence  $\{a_n\}_{n=1}^{\infty}$  converges, then the sequence  $\{b_n\}_{n=1}^{\infty}$  also converges. I would have to look up the basic statement of those two sequences to be absolutely sure, but if I remember correctly, both sequences need to be Cauchy. (Technically speaking,  $\sum a_n$  needs to be absolutely convergent

---

to be  $\lim_{n \rightarrow \infty} \sum_{k=1}^n a_n = \sum_{k=1}^{\infty} a_n$ , but it's in the same neighbourhood of convergence). I would also guess that a proof of the statement could be done using  $\lim_{n \rightarrow \infty} \sum_{k=1}^n a_k = \sum_{k=1}^{\infty} a_k$  and the definition of a Cauchy sequence. A: If  $\{a_n\}$
